## **RESEARCH AREAS**

- Organization and management of complex organizations
- Organizational learning
- Professional and inter-organizational networks
- Health care innovations and technologies
- Governance and policies of technological innovations in health care

## **RESEARCH PROFILE**

After a BA Degree in Economics of Public Administration and International Institutions (CLAPI) from Bocconi University (Milan, Italy, 2006) and a Master's Degree in Health Care Policy and Management (Cum Laude) from the Università Cattolica del Sacro Cuore (Rome, Italy, 2009), Valentina Iacopino obtained a PhD in Health Care Policy and Management from UCSC in 2013, discussing a dissertation entitled "Patterns of Technological Innovation within Organizations and Networks: Empirical Evidence on Robotic Surgery in Italy". From 2014 to March 2019, she conducted her research as Post-doctoral Researcher (UCSC) and from April 2019 to April 2020, as Assistant Professor (Research, private contract, LUISS University, Department of Business and Management). She acquired further academic experiences as Visiting Scholar and Research Fellow at the University of Greenwich (London, UK) and at the University of Italian Switzerland (USI, Lugano, Switzerland), respectively. Her research interests include the study of innovations in health care at institutional, organizational, and professional level. In her research, she applies both Social Network Analysis (SNA) techniques and more traditional methodologies to understand the role of inter-organizational and professional networks in the process of adoption, diffusion, and implementation of medical technologies. She is also interested in understanding the antecedents of organizational learning in complex organizations, such as hospitals, as well as team processes and dynamics in the context of organizational change. Finally, in her studies, she explores the factors affecting the digital readiness and maturity of organizations. Valentina Iacopino participated in several research projects in these topics, both at National and European level and has been advisor of public and private organizations in the health care sector (Italian Ministry of Health, Italian National Agency for Regional Healthcare Services, Italian Association of Insurance Companies).
